COMMENTS/SUMMARY

Average Calorie intake/ person /day

Actual consumption by households, obtained from separate analysis, was found that, none of the households managed to consume enough calories of 2400 as recommended by WHO.

This is one indicator of household food insecurity among rural people. People with inadequate food intake are unhealthy. Unhealthy citizens will lead into unhealthy nation and this has a great bearing on national economy due to low productivity.

Ideal Food Items Cost

Prices for the ideal food items from six food groups, required for a family of 6, that gives approximately a total of 2400 calories, were collected at the end of September 2018 from surrounding markets.

Basing on this ideal food list, food cost was calculated. It was found out that, in an ideal situation, TA Mlumbe households were supposed to have MK78,125 to buy enough food to give them an average of 2400 calories but the income was only K4,250.

Ideal Non-Food Cost + School expenses

Prices for the ideal Non-Food items required for a family of 6 were also collected from the surrounding markets. Basing on these Ideal Non-Food items on the list, the cost for these was calculated to find the ideal Non-Food Items cost. This also includes

school expenses and the cost of school expenses (K20,534) is uniform across. This is because average mark was found when we surveyed expenses from government owned primary and community day secondary schools with an assumption that a household has 2 pupils at primary and 2 at secondary level and that since the expenses are incurred on term basis (3 months) it was calculated in such a way that the expenses are incurred on monthly basis (cost incurred in a term were divided by 3). The survey indicated that households from TA Mlumbe (had it been that they had enough money), ideally, they could have incurred more expenses (K31,500 + K20,534) than other areas to pay for ideal non-food items for a family of 6 during the month of September.

The Cost of Living vs Monthly Income

The Cost of Living = Ideal Food Items Cost + Ideal Non-Food Items Cost + School Expenses

In the month of August 2018, the cost of living in TA Mlumbe in Zomba was highest at MK130,159 while TA Tambala was lowest at MK112,254. This means that households of TA Mlumbe were supposed to have an income of K130,159 to buy food worthy K78,125 that would give them 2400 Kilocalories, buy enough nonfood items worthy K31,500 and pay school expenses at K20,534 but a household got only MK5,239 against the cost of living of MK130,159.

This MK5,239 represents 4% of MK130,159, with a gap of 96%. With this household economy, a rural household cannot lead a decent life and live with dignity.

NB: 1 USA Dollar (\$) = 730 Malawian Kwacha (MK)

The Social Conditions Research Programme of the CfSC conducted these surveys during the month of September 2018 in these TAS: Khongoni in Lilongwe, Tambala in Dedza, M'mbelwa in Mzimba and Mlumbe in Zomba.
